

American Statistical Association

1993 Proceedings

of the

Section on Statistical Education

Papers presented at the Annual Meeting of the American Statistical Association, San Francisco, California, August 8-12, 1993, under the sponsorship of the Section on Statistical Education

UB/TIB Hannover 89
113 264 593

American Statistical Association ■ 1429 Duke Street, Alexandria, VA 22314

Table of Contents

Invited Papers by Topic

I.	Consulting: Bridging the Gap Between Statistics and the Agricultural Sciences Chair/Organizer: <i>Linda J. Young</i> , University of Nebraska	
	Planning a Study with Repeated Measurements. <i>Ramon C. Littell</i> and <i>Scott P. Morrison</i> , University of Florida	1
	Designed Experiments in the Presence of Spatial Correlation. <i>David B. Marx</i> , University of Nebraska	4
II.	Continuing Education in Statistics and Epidemiology Chair/Organizer: <i>Stanley P. Azen</i> , University of Southern California	
	A Guide to the Design, Analysis, and Conduct of Clinical Trials with Computer Software. <i>Joyce C. Niland</i> , City of Hope National Medical Center	14
III.	Introductory Statistics Courses—New Projects Chair/Organizer: <i>Jeffrey A. Witmer</i> , Oberlin College	
	Activity-Based Statistics. <i>Mrudulla Gnanadesikan</i> , Fairleigh Dickinson University	20
	Elementary Statistics Laboratory. <i>John D. Spurrier</i> , <i>Don Edwards</i> , and <i>Lori A. Thombs</i> , University of South Carolina	23
IV.	Assessment Issues Related to Teaching and Learning Statistics Organizer: <i>Joan B. Garfield</i> , University of Minnesota Chair: <i>David S. Moore</i> , Purdue University	
	Feeling Certain About Uncertain Things: The Role of Beliefs and Attitudes in Learning Statistics. <i>Iddo Gal</i> and <i>Lynda Ginsburg</i> , University of Pennsylvania	29
V.	Statistics: Motivation for Change in K-12 Math and Science Organizer: <i>Richard L. Scheaffer</i> , University of Florida Chair: <i>James M. Landwehr</i> , AT&T Bell Laboratories	
	The Science Lab: An Opportunity for Real Statistical Analyses in the Schools. <i>Jeffrey A. Witmer</i> , Oberlin College	39

VI.	Key Issues in Grantsmanship Chair/Organizer: <i>Ronald L. Wasserstein</i> , Washburn University	
	Issues in Grantsmanship, or, I Want Money...Lots and Lots of Money...I Want the Pie in the Sky... <i>Jane F. Pendergast</i> , University of Florida	42
VII.	Teaching of Statistics in the Health Sciences Using A Geometric Approach Chair/Organizer: <i>Richard Chappell</i> , University of Wisconsin	
	Direction: The Invisible Player. <i>Robert E. Johnson</i> , Virginia Commonwealth University; <i>David G. Herr</i> , University of North Carolina	48
	Teaching the Geometry of Nonlinear Models. <i>Douglas M. Bates</i> , University of Wisconsin	53
	Discussion: Teaching Statistics—A Geometric Approach. <i>Peter B. Imrey</i> , University of Illinois	60

Contributed Papers by Topic

I.	Advanced Statistics Courses Chair: <i>Donald L. Bentley</i> , Pomona College	
	Teaching Design of Experiments—A Response Modeling Approach. <i>Daniel A. Greer</i> , Storage Technology Corporation	63
	The Role of Randomization in Establishing Causation: A Physical Demonstration. <i>R.W. Oldford</i> , University of Waterloo	67
	On Teaching Structural Modeling: Some Thoughts and Reflections. <i>Barry M. Katz</i> and <i>Terry J. Tomazic</i> , Saint Louis University	73
	Reading Notes: Letting the Students Tell Us What’s Wrong with the Text and the Course. <i>Alvin C. Rencher</i> , Brigham Young University	79
	An Accessible Proof of the General Form of Craig’s Theorem. <i>Michael F. Driscoll</i> , Arizona State University; <i>Barbara Krasnicka</i> , Henry M. Jackson Foundation	82
	Synoptic Diagrams for Teaching Statistical Inference. <i>John Fresen</i> , University of The Western Cape, South Africa	86
II.	Real Data, Computers, and Other Good Things in Introductory Statistics Education Chair: <i>Mary Fleming</i> , Eastern Kentucky University	
	The ASA Education Section’s Transparency Master Book. <i>Harry O. Posten</i> , University of Connecticut; <i>Roger Carlson</i> , University of Missouri; and <i>Larry Sherr</i> , University of Kansas	91

Some Data Sets That Enlighten Students While They Work at a PC. <i>Edward R. Mansfield, B. Michael Adams, J. Brian Gray, and Michael D. Conerly</i> , University of Alabama	93
Teaching Statistics to Clinician Managers in an On-Campus/Off-Campus Degree Program. <i>Daniel J. Zaccaro</i> , Wake Forest University	99
Statistical Requirements in Nursing Education. <i>Miriam S. Grosop</i> , Stern College; <i>Hyman Sardy</i> , Brooklyn College	104
III. Models of University Statistical Consulting Centers Organizer: <i>Barbara L. Mann</i> , Wright State University Chair: <i>Evelyn H. Pickering</i> , Wright State University	
Statistical Consulting at Wright State University. <i>Barbara L. Mann</i> , Wright State University	107
Statistical Consulting at Virginia Polytechnic Institute and State University. <i>Golde I. Holtzman</i> , Virginia Polytechnic Institute and State University	112
Statistical Consulting at New Mexico State University. <i>Leigh W. Murray</i> , New Mexico State University	118
Marketing Statistical Consulting. <i>John H. Schuenemeyer</i> , University of Delaware	123
IV. Teaching Statistics in the Health Sciences: Aids and Examples Chair: <i>Tamara Odom-Maryon</i> , City of Hope Medical Center	
Teaching Bayes' Theorem Using Paper Dolls. <i>H.B. Slotnick</i> , University of North Dakota	127
Introductory Biostatistics and Epidemiology Instruction at the University of Louisville School of Medicine. <i>Stephen W. Looney</i> and <i>R. Prasaad Steiner</i> , University of Louisville	132
V. Are Videotaping and Psychology Worth the Effort for Statistical Consultants? Organizer: <i>Douglas A. Zahn</i> , Florida State University Chair: <i>Donald Guthrie</i> , University of California	
Using Videotape and Psychology: Lessons Learned Lately. <i>Douglas A. Zahn</i> , Florida State University	136
Discussion. <i>James R. Boen</i> , University of Minnesota	142
Are Videotaping and Psychology Worth the Effort for Statistical Consultants? <i>Janice A. Derr</i> , Penn State University	143

Are Videotaping and Psychology Worth the Effort for Statistical Consultants? <i>Sandra Stinnett, University of North Carolina</i>	148
Discussion. <i>Barbara A. Bailer, American Statistical Association</i>	152
VI. Statistics and Numeracy in the Schools Organizer: <i>Rosemary A. Roberts, Bowdoin College</i> Chair: <i>Judith R. O'Fallon, Mayo Clinic</i>	
Teaching Statistics Using the Quantitative Literacy Series. <i>Daniel T. Voss,</i> <i>Wright State University</i>	154
A Model Teacher Enhancement Program in Statistics. <i>Bodapati V.R. Gandhi,</i> <i>University of Puerto Rico</i>	160
Discussion: Statistics and Numeracy in Schools. <i>Jerry L. Moreno,</i> <i>John Carroll University</i>	166
VII. Novel Approaches to Teaching Statistical Concepts Chair: <i>Patricia L.J. Busk, University of San Francisco</i>	
Are Two Better Than One? <i>Brian Jersky, Sonoma State University</i>	169
The “Tertium Quid” in Teaching Hypothesis Testing. <i>Dana Quade,</i> <i>University of North Carolina</i>	172
The Mean, the Median, and the Mundane: Exploiting Everyday Images for Statistical Insight. <i>Woollcott Smith and Larry Gonick, Temple University</i>	175
Dot-Chart—A New Way to Present Experimental Findings in Educational Research. <i>Richard Tamburro and Morgan Wang, University of Central Florida</i>	180
VIII. Statistics Education for Engineering and Business Chair: <i>Katherine T. Halvorsen, Smith College</i>	
Enhancing Statistical Education for Engineers. <i>James A. Alloway, Jr.,</i> <i>Syracuse University</i>	182
A Modular Laboratory and Project-Based Statistics Curriculum. <i>Joseph D. Petrucci</i> <i>and Balgobin Nandram, Worcester Polytechnic Institute</i>	187
A Collaborative Project to Teach Statistics to Industrial Researchers. <i>D.M. Girard</i> and <i>D. Jowett, University of Wisconsin; J. Pounder and K. Johnson,</i> <i>James River Neenah Technical Center</i>	192

The Use of Control Charts in Marketing Research. *Timothy C. Krehbiel, Charles T. Crespy,*
and *James M. Stearns*, Miami University, Ohio 196

Computer Software in Quality. *Ron Barnes* and *R.C. Pierce*, University of Houston 202

IX. Computers in Statistics Education
Chair: *Anne Sevin*, Framingham State College

Computer Usage in an Undergraduate Statistical Methods Sequence. *Charles J. Sommer*
and *James McNamara*, SUNY at Brockport 204

PC-Based Simulation of Statistical Power with Business Law Applications.
Deborah S. Kleiner, St. John's University; *Michael Borenstein*, Hillside Hospital 210

A Mathematical Modeling Course. *Darryl Katz*, California State University 214

The Use of Simulation in an Upper Level Course. *Cheryl Wallgren*,
Southeast Missouri State University 220

Contributed Papers—Poster Sessions

Statistical Training in Industry. *Mike Pore*, Advanced Micro Devices 222

Minitab: Successful Choices in an Introductory Statistics Class. *Frank H. Dietrich II*
and *David B. Agard*, Northern Kentucky University 228

**Papers presented at the
1992 Joint Statistical Meetings
Boston, Massachusetts
August 9-13, 1992**

Invited Papers by Topic

**I. Improving Statistical Literacy: Classroom, Community, and
Consulting Issues**
Chair/Organizer: *Gwyneth Boodoo*, Educational Testing Service

Conceptualizing Applied Statistics: A Current Need. *Sharon L. Weinberg*,
New York University 233

Improving Statistical Literacy Among Consultants and Clients. *Patricia L. Busk*,
University of San Francisco 239

Statistical Literacy for Whom: The Case of the Two-Year Colleges. <i>Miriam Schapiro Grosop</i> , Stern College; <i>Hyman Sardy</i> , Brooklyn College	247
Improving Statistical Literacy: Discussion. <i>Juliet Popper Shaffer</i> , University of California	254
II. Things To Do In Class On Monday: Techniques For Improving Statistics Instruction Organizer: <i>Henry B. Slotnick</i> , University of North Dakota Chair: <i>Robert V. Hogg</i> , University of Iowa	
Using M&Ms to Teach Binomial Confidence Interval Estimation to Medical Researchers. <i>Judith Rich O'Fallon</i> , Mayo Clinic	258
Index	267
