Interested in Social-Economic-Political Issues? Learn
how to read and interpret summary statistics found in tables, graphs, statements, survey and studies.   Analyze news stories that use summary statistics as evidence for causal connections. Learn how to distinguish stronger evidence from weaker evidence. Helps prepare for the LSAT, GMAT and GRE.

Need QR Graduation Skill? This course satisfies all of Augsburg's
quantitative reasoning (QR) graduation skills including the Quantitative Foundation (QF) and Quantitative Application (QA) requirements.

Right-Brain Dominant? This course focuses more on English than on
algebra. While Algebra can be used to describe conditional probability, English is much more common. English is needed to describe and evaluate study designs, ratios, types of bias, associations and factors taken into account.

Travel or Commuting a Problem? Take this course on-line.
All homework, quizzes, media-story analysis and final are done on-line. There is no physical class for this course. Take this course from anywhere in the world.

Like Gaming? Try Odyssey: a new multi-player web game.
