

Common Sense Mathematics (2nd ed.)

Ethan Bolker and Maura Mast

Table of Contents

- Chapter 1. Calculating on the Back of an Envelope 23
 - 1.1. Hailing a ride 24
 - 1.2. How many seconds? 26
 - 1.3. Heartbeats 27
 - 1.4. Calculators 28
 - 1.5. Millions of trees? 29
 - 1.6. Carbon footprints 30
 - 1.7. Kilo, mega, giga 31
- Chapter 2. Units and Unit Conversions 49
 - 2.1. Rate times time equals distance 49
 - 2.2. The MPG illusion 51
 - 2.3. Converting currency 53
 - 2.4. Unit pricing and crime rates 55
 - 2.5. The metric system 56
 - 2.6. Working on the railroad 58
 - 2.7. Scientific notation, milli and micro 59
 - 2.8. Carpeting and paint 61
- Chapter 3. Percentages, Sales Tax and Discounts 87
 - 3.1. The federal budget 87
 - 3.2. Red Sox ticket prices 90
 - 3.3. The 1+ trick 90
 - 3.4. Exploiting the 1+ trick 92
 - 3.5. Large and small percentages 93
 - 3.6. Percentage points 95
 - 3.7. Percentiles 95
- Chapter 4. Inflation 123
 - 4.1. Red Sox ticket prices 123
 - 4.2. Inflation is a rate 124
 - 4.3. The Consumer Price Index 126
 - 4.4. More than 100% 126
 - 4.5. How much is your raise worth? 127
 - 4.6. The minimum wage 127
 - 4.7. Inflation history 129
- Chapter 5. Average Values 139
 - 5.1. Average test score 139
 - 5.2. Grade point average 140
 - 5.3. Improving averages 141
 - 5.4. The Consumer Price Index 142
 - 5.5. New car prices fall ... 144
 - 5.6. An averaging paradox 145
- Chapter 6. Income Distribution — Spreadsheets, Charts and Statistics 153
 - 6.1. Salaries at Wing Aero 154
 - 6.2. What if? 158
 - 6.3. Using software 158
 - 6.4. Median 159
 - 6.5. Bar charts 160
 - 6.6. Pie charts 163
 - 6.7. Histograms 164
 - 6.8. Mean, median, mode 166
 - 6.9. Computing averages from histograms 167
 - 6.10. The bell curve 168
 - 6.11. Margin of error 171

Common Sense Mathematics (2nd ed.)

Table of Contents

- Chapter 7. Electricity Bills and Income Taxes — Linear Functions 191
 - 7.1. Rates 191
 - 7.2. Reading your electricity bill 192
 - 7.3. Linear functions 194
 - 7.4. Linear functions in a spreadsheet 195
 - 7.5. Which truck to rent? 199
 - 7.6. Energy and power 200
 - 7.7. Federal payroll taxes 202
- Chapter 8. Climate Change — Linear Models 221
 - 8.1. Climate change 221
 - 8.2. The greenhouse effect 225
 - 8.3. How good is the linear model? 227
 - 8.4. Regression nonsense 228
- Chapter 9. Compound Interest — Exponential Growth 239
 - 9.1. Money earns money 239
 - 9.2. Exploring exponential growth with a spreadsheet 241
 - 9.3. Depreciation 243
 - 9.4. Doubling times and half-lives 244
 - 9.5. Exponential models 247
 - 9.6. “Exponentially” 249
- Chapter 10. Borrowing and Saving 265
 - 10.1. Debit and credit cards 265
 - 10.2. Can you afford a mortgage? 269
 - 10.3. Saving for college or retirement 271
 - 10.4. Effective interest rate 272
 - 10.5. Instantaneous compounding 273
- Chapter 11. Probability — Counting, Betting, Insurance 279
 - 11.1. Equally likely 279
 - 11.2. Odds 280
 - 11.3. Raffles 281
 - 11.4. State lotteries 282
 - 11.5. The house advantage 285
 - 11.6. One-time events 287
 - 11.7. Insurance 288
 - 11.8. Sometimes the numbers don’t help at all 289
- Chapter 12. Break the Bank — Independent Events 297
 - 12.1. A coin and a die 297
 - 12.2. Repeated coin flips 299
 - 12.3. Double your bet? 301
 - 12.4. Cancer clusters 302
 - 12.5. The hundred year flood 303
 - 12.6. Improbable things happen all the time 305
- Chapter 13. How Good Is That Test? 313
 - 13.1. UMass Boston enrollment 313
 - 13.2. False positives and false negatives 315
 - 13.3. Screening for a rare disease 317
 - 13.4. Trisomy 18 318
 - 13.5. The prosecutor’s fallacy 320
 - 13.6. The boy who cried “Wolf” 321
