View full-page in Google Scholar

- 18 h-index: 15 Stat & Physics papers with at least 15 citations each.
 The h-index is an author-level metric that attempts to measure both the productivity and citation impact of the publications of a scientist or scholar.
 The index is based on the set of the scientist's most cited papers and the number of citations that they have received in other publications.
- 24 i10 index: 22 Stat & physics papers with at least 10 citations each
 i10-Index = the number of publications with at least 10 citations.
 This very simple measure is only used by Google Scholar, and is another way to help gauge the productivity of a scholar.

RGR: **Reads** (opens/downloads) of Schiold paper from just ResearchGate website
Titles in Bold: Papers that have been peer-reviewed or were invited to appear in a journal or book.

To access RG citations by paper being cited

- 1 Select RESEARCH. In Stats overview, click on Citations VIEW
- 2 At the top under Research Items, select NEWEST
Clicking on OLDEST works just one time. Then it must be re-selected.
- 3 Page down to find the section containing the next paper
- 4 Click on the desired item. Record citations and views.

To access Google Scholar with citations shown

- 1 Go to Google Scholar.
- 2 Access Milo Schiold. Click on **Profile**

To access RG citations by year cited

- 1 Select STATS. In Stats overview, click on Citations VIEW
- 2 Select YEAR. Unfortunately, this is Year REPORTED; not the year PUBLISHED.

To access Google Scholar without citations shown

- 1 Go to Google Scholar.
- 2 Access Milo Schiold. Do NOT click on Profile
- 3 Scroll down to next item.
