P3-Demo: Practice-Run Instruction ..... 43
1 Obtain PR3 Demo data. Create averages for all 8 variables (columns) ..... 44
2 Create pivot tables and describe selected values. ..... 45
Two group table of counts as shown. Two-way table of counts as shown. ..... 46
Two-group table of averages as shown. Two-way table of averages as shown. ..... 47
Two-group table of statistics as shown. ..... 48
Two 100\% tables: \% of Row and \% of Col as shown.49
Two-way half table: Average that said Yes to those shown [Format as percentages]51

Describe a total cell and a body cell

## TWO-GROUP COUNT TABLE

Construct a two-group count table on Q1

| Count of Q1 |  |
| :--- | ---: |
| Q1 | Total |
|  | 0 |

Symbolic1: 40 subjects are in the Total row
Symbolic2: 40 subjects took this survey
Actual: 40 subjects took this survey

Symbolic1: 25 subjects are in row \#1
Symbolic2: 25 [respondents] said Yes to Q1
Actual: $\mathbf{2 5}$ respondents are females
TWO-GROUP TABLE OF AVERAGES
Construct average table for Q7 indexed by Q1

| Average of Q7 |  |
| :--- | ---: |
| Q1 | Total |
|  | 0 |

Symnbolic1: 68.8 is mean of Q7 in row \#3
Symbolic: 68.8 is mean of Q7 for these respondents
Actual: The average height of these students is 68.8"

Sym: 65.5 is mean of Q7 among populiation in row \#2
Symbol: 65.5 is mean of Q7 of those saying Yes to Q1
Among women students, the average height is 65.5"

TWO-GROUP TABLE: SUMMARY STATISTICS
Construct statistics table for Q2 indexed by Q1

| Q1 | Data | Total |
| :--- | :--- | ---: |
|  | 0 | Average of Q2 |
|  | Count of Q2_2 | 0.53 |
|  | 15 |  |
|  | Average of Q2 | 0.32 |
|  | Count of Q2_2 | 25 |
| Total Average of Q2 | 0.4 |  |
| Total Count of Q2_2 | 40 |  |

[Just describe the average]
Average of zero-one binary gives percentage of ones.
Drag Q2 into the body area twice.

Of those in row \#3, the average of Q2 is 0.40 (40\%)
Of all respondents, $\mathbf{4 0 \%}$ are Seniors

Of those in row \#2, the average of Q2 is 0.32 (32\%)
Of the females, $\mathbf{3 2 \%}$ are seniors

Describe a total cell and a body cell

## TWO-WAY COUNT TABLE

Construct a two-way count table on Q1 and Q2

| Count of Q1 | Q2 |  |  |
| :--- | ---: | ---: | ---: |
| Q1 | 0 | 1 | Total |
|  | 0 | 7 | 8 |
|  | 1 | 17 | 8 |
| Total | 24 | 16 | $\mathbf{2 5}$ |

Symbolic1: 16 of those in column \#2 are in row \#3.
Symbolic2: 16 [respondents] said Yes to Q2.

## Actual: 16 respondents are seniors.

Symbolic1: 8 of these are in row \#2 and in column \#2.
Symbolic2: 8 of those said Yes to Q1 and Yes to Q2.
Actual: 8 respondents are female seniors.

TWO-WAY TABLE OF AVERAGES
Construct average table for Q7 indexed by Q1 and Q2

| Average of Q7 | Q2 |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | :---: |
| Q1 | 0 | 1 | Total |  |  |
|  | 0 | 70.3 | 77.6 | 74.2 |  |
|  | 1 | 64.6 | 67.4 | 65.5 |  |
| Total | 66.3 | 72.5 | 68.8 |  |  |

Symbolic: 72.5 is mean of Q7 among those in col \#2
S2: 72.5 is mean of Q7 among those saying Yes to Q2
Among seniors, the average height is 72.5"

S: 67.4 is mean of Q7 for those in row \#2 and column \#2
S: 67.4 is mean of Q7 among those saying Yes to Q1 \& Q2
A: Among female seniors, mean height is 67.4 yrs

TWO-GROUP TABLE: SUMMARY STATISTICS
Construct statistics table for Q7 indexed by Q1

| Q1 | Data | Total |
| :--- | :--- | ---: |
|  | 0 | Average of Q7 |
|  | Count of Q7_2 | 74.20 |
|  | StdDev of Q7_3 | 15 |
|  | 1 | Average of Q7 |
|  | Count of Q7_2 | 65.52 |
|  | StdDev of Q7_3 | 25 |
| Total Average of Q7 | 17.86 |  |
| Total Count of Q7_2 | 68.78 |  |
| Total StdDev of Q7_3 | 40 |  |

Of those in row \#3, the average of Q7 is 66.78"
Average height of all subjects is 68.78 "

Of those in row \#1, the average of Q7 is 74.20"
Average height for males is 74.2"

Describe a total cell (not 100\%) and a body cell. Describe a total cell (not 100\%) and a body cell.

FULL 100\% ROW TABLE
Construct row table for Q1 (row) vs Q2 (col)

| Count of Q1 | Q2 |  |  |
| :--- | ---: | ---: | ---: |
| Q1 | 0 | 1 | Total |
|  | 0 | $47 \%$ | $53 \%$ |
|  | $100 \%$ |  |  |
| Total | $68 \%$ | $32 \%$ | $100 \%$ |

Note: Cloest $100 \%$ gives the whole (pie)

Symbolic1: 40\% of those in row \#3 are in column \#2. Symbolic2: 40\% [of respondents] said Yes to Q2

## Actual: 40\% of respondents are seniors.

$32 \%$ of those in row \#2 are in column \#2.
32\% of those saying Yes to Q1 said Yes to Q2.
$32 \%$ of women are seniors.

FULL 100\% COLUMN TABLE
Construct column table for Q1 (row) vs Q2 (col)

| Count of Q1 | Q2 |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Q1 | 0 | 1 | Total |  |
|  | 0 | $29 \%$ | $50 \%$ | $38 \%$ |
|  | 1 | $71 \%$ | $50 \%$ | $63 \%$ |
| Total | $100 \%$ | $100 \%$ | $100 \%$ |  |

Note: Cloest 100\% gives the whole (pie)

Symbolic1: 63\% of those in column \#3 are in row \#2.
Symbolic2: 63\% [of respondents] said Yes to Q1.

## Actual: $\mathbf{6 3 \%}$ of respondents are female

$71 \%$ of those in column \#1 are in row \#2.
$71 \%$ of those saying No to Q2 said Yes to Q1.
71\% of non-seniors are female

TWO-WAY HALF-TABLES OF PERCENTAGES
Construct average table for Q3 indexed by Q1 and Q2
Average of binary gives percentage who said Yes.
Saying Yes to Q3 is the common part in all cells

| Average of Q3 | Q2 |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Q1 | 0 | 1 | Total |  |
|  | 0 | $57 \%$ | $88 \%$ | $73 \%$ |
|  | 1 | $29 \%$ | $38 \%$ | $32 \%$ |
| Total | $38 \%$ | $63 \%$ | $48 \%$ |  |

Sym: Of those saying Yes to Q1, 32\% said Yes to Q3 Among women students, $\mathbf{3 2 \%}$ live on campus.

Of those saying Yes to Q1 \& Q2, 32\% said Yes to Q3.
Actual: $\mathbf{3 8 \%}$ of female seniors live on campus.

Construct average table for Q4 indexed by Q1 and Q2.
Average of binary gives percentage who said Yes.
Saying Yes to Q4 is the common part in all cells

| Average of Q4 | Q2 |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Q1 | 0 | 1 | Total |  |
|  | 0 | $0 \%$ | $75 \%$ | $40 \%$ |
|  | 1 | $6 \%$ | $50 \%$ | $20 \%$ |
| Total | $4 \%$ | $63 \%$ | $28 \%$ |  |

Symbolic: Of those saying Yes to Q2, 63\% said Yes to Q4 Symbolic: Among seniors, 20\% are business majors.

Sym: Of those saying Yes to Q1 \& Q2, 50\% said Yes to Q4 Actual: 50\% of female seniors are business majors.
